CASA Viewer Spectral Profile Tool does not offer moment type selection

Dirk Petry - 2020-09-21 - Offline Data Reduction and/or CASA

If you are in "optical" mode in the CASA viewer spectral profiler, only the moments sum, mean, and median are offered.

If you want others, you need to switch to "non-optical" mode: Click on the "toothed wheel" icon at the top of the window

(4th from the left), then un-tick the "optical" option and click OK.

Now you should have a selection of more than 10 different possible moments to calculate.
