Do all my collaborators need to be registered in the ALMA Science Portal before proposal submission?

Maria Diaz Trigo - 2023-11-01 - Project Planning

Registration in the Science Portal of the Principal Investigator (PI) and of all co-Investigators (co-Is) is required for submission of ALMA proposals. Furthermore, this service is available at any time.

To avoid last-minute problems with registration, which may prevent submission of a proposal, it is strongly recommended that all potential PIs and co-Is of ALMA proposals register through the ALMA portal at least 24 hours before the proposal deadline.
