---

How can I see the observation date, the QA0 status, the frequency resolution, the PI name, the largest angular scale, the sensitivity or the QA status of an observation?

Felix Stoehr - 2020-09-21 - Archive & Data Retrieval

On the results page of the Archive query interface at <http://almascience.org/aq> click with the mouse on the "more columns" link in the top left corner. All columns above the red bar will be displayed. Use the mouse to either drag&drop the red bar or a column to show more or less columns. Or use the checkbox in front of a column name to quickly add or remove a column from the display.
