How many pointings can my proposal contain in Cycle 2?

Sarah Wood - 2024-10-08 - General

A Cycle 2 proposal may contain up to a total of 150 pointings per Science Goal (combining all mosaic and offset pointings, sources and a maximum of 5 tunings) with the important restriction that these must be spaced no more than 10 degrees apart on sky. There is no restriction on the number of Science Goals.

Please refer to section 7 of the [ALMA Cycle 2 Capabilities](#).
