I can't access the archive query interface at my ARC, how can I get my data?

Felix Stoehr - 2020-09-21 - Archive & Data Retrieval

From time to time one of the ARCs is undergoing maintenance and the Archive Query interface and/or the Request Handler might be temporarily down. For longer outages such maintenance is announced on the front page of the Science Portal of the ARC.

As all ARCs have identical copies of the entire data holdings and tools, please download your data from a different ARC.
