In cycle 0, what time of day will be available for observing?

Imported User 55 - 2025-03-11 - Early Science - Cycle 0

In cycle 0, time will be shared between science operations and "commissioning and science verification" (CSV) activities. CSV will have priority over science operations. Cycle 0 observations will be scheduled during blocks of 8 to 12 hours, mainly during the nighttime. See the cycle 0 policies (Chapter 5) of the [ALMA Cycle 0 Proposer's Guide \(ver. 1.1 May, 2011\)](#).
