To which category should I submit a proposal on distant galaxies: "cosmology/high-z" or "Galaxies/Nuclei"?

Maria Diaz Trigo - 2020-09-21 - Proposal Handling

The science category of a proposal is used to help assign that proposal to a qualified assessor. Therefore, the proposer should decide in which category his/her proposal will be best evaluated. The category may be modified by the JAO if another category is judged to better describe the science of the proposal.
