What bands, frequencies, or wavelengths are available in Cycle 0?

Anthony Remijan - 2025-03-11 - Early Science - Cycle 0

Four observing bands will be available for cycle 0 (Early Science) observations. They are designated bands 3, 6, 7, 9. The nominal frequency ranges are:

Band 3:	84 - 116 GHz	2.6 - 3.6 mm
Band 6:	211 - 275 GHz	1.1 - 1.4 mm
Band 7:	275 - 373 GHz	0.8 - 1.1 mm
Band 9:	602 - 720 GHz	0.4 - 0.5 mm

For more information on the observing bands, frequencies or wavelengths available for early science observations, refer to the [Capabilities page](#) in the science portal.
