What CASA version was used for QA2?

Sarah Wood - 2020-09-21 - Offline Data Reduction and/or CASA

After downloading your data from the ALMA Archive you can check what version of CASA was used for the QA2 process in one of the following ways:

- Check the qa2_report found in the qa directory
- Check the README file at the MOUS level
- Check the top right of the weblog home page (index.html) found in the qa directory
- Check the top of the CASA.log files found in the logs directory
- Check the scriptsForCalibration or scriptsForImaging in the scripts directory

Please send a HelpDesk ticket if you still cannot identify what version of CASA was used.
