What Cycle 7 proposal issues and clarifications should I be aware of before submitting my proposal?

Sarah Wood - 2020-09-21 - Historical Articles

This Knowledgebase article is a repository for information relevant to submission of Cycle-7 proposals. These items may affect how users write their proposals or set up their observations in the OT. The content may evolve rapidly as the 17 April, 2019 proposal deadline approaches. Items added to this list after its initial deployment will include the date they were added. We encourage all PIs to check back here regularly prior to proposal submission.

OT Issues and Updates

- **OT Known Issues for Cycle 7**
- Java issues: from testing it appears as if the OT will only work using Java 8. This remains the default and recommended version by Oracle and is downloadable from [www.java.com](http://www.java.com). As Oracle have moved to a six-monthly release cycle, it is possible that users will have Java 9 or higher installed on their system. As we do not think that the OT will work with these versions we strongly recommend that Java 8 be installed instead. More information can be found in the OT [Troubleshooting](#) pages.
