Where can I find the ALMA Science Verification targets and observing parameters?

John Hibbard - 2021-03-18 - Archive & Data Retrieval

Science Verification data can now be searched and downloaded directly from the ALMA Science Archive interface at <https://almascience.org/aq>.

In addition, a table of ALMA Science Verification (SV) targets and observing parameters is provided at the "Data -> Science Verification" link from the ALMA Science Portal (<http://almascience.org>). A description of the SV process and policies is given at <http://almascience.org/alma-data/science-verification/science-verification-wiki-info>
