Where can I find the ALMA Science Verification targets and observing parameters?

A table of ALMA Science Verification (SV) targets and observing parameters is provided at the "Data -> Science Verification" link from the ALMA Science Portal. A description of the SV process and policies is given at http://almascience.org/alma-data/science-verification/science-verification-wiki-info

Science Verification data can be searched and downloaded directly from the ALMA Science Archive interface at https://almascience.org/ag.
