Where can I find the configuration files for ALMA Early Science in Cycle 0?

Imported User 25 - 2025-03-11 - Early Science - Cycle 0

Where can I find the configuration files for ALMA Early Science in Cycle 0?

If you are using CASA version 3.2, then the antenna configurations for Cycle 0 (Early Science) are included in your CASA installation.

If you are using an earlier version of CASA and don't want to get the newest version, you can download the Compact and Extended array configuration files from the "Antenna Configuration Files" section of the [Documents and Tools page](#) in the ALMA Science Portal.
