Why have I not received email notification for some or all of my Proposals?

Erica Keller - 2020-09-21 - Proposal Handling

In some cases, email notification of your proposal status has been sent to the spam folder. The PI should check for emails from ph1m_noreply@alma.cl . The PI may notice a delay between notifications for multiple projects.

Please submit a helpdesk ticket to the "General Queries" department if you have not received notification.
