Why won't the "Target List" upload feature work in the NA ALMA archive?

John Hibbard - 2020-09-21 - Archive & Data Retrieval

The North American ALMA archive query interface (<http://almascience.nrao.edu/aq/>) has security settings which prevent a user from uploading a list of sources or positions to query. However, the European (<http://almascience.eso.org/aq/>) and East Asian (<http://almascience.nrao.edu/aq/>) query interfaces do not have these restrictions, so you can use these to perform multi-positional searches.
